PDH

PDH stands for Pain Drug Hypnosis. It is known to some psychiatrists as a means of compelling obedience. They sometimes use it on psychotics.

The trouble with detecting PDH was learned in 1952 when we found FAC ONE (a 1,000,000 to 1,250,000 years ago incident). People think they have been PDH'ed when they haven't.

You can easily get a panic going on PDH. We found out all about such panics in 1952 when a dozen people were certain another had PDH'ed them.

There haven't been any current PDHes.

As we're attacking psychiatrist inhumanity to man we can easily get a motivator keyed in. So cool off any flaps about PDH. Tell people the above facts, particularly 1952.

Psychiatrists are so afraid of us they are attacking themselves! A recent "Time" magazine carried one of many such articles under "Medicine".

Even if a Scientologist were PDHed, it would run out easily with modern auditing in very short order. Might as well be afraid of toe stubs.

On psychotics it would be more serious as, not having an auditor handy he'd just go out and assassinate somebody.

So cool off any such.

Best,

Ron
