

HCO EXECUTIVE LETTER OF 7 APRIL, 1965

Gen. Non Resimco
Post Public Board

TO: ALL SCIENTOLOGISTS
FROM: RON
SUBJECT: RON'S JOURNAL NO. 11
E-METER PERSECUTION! BY THE FOOD AND DRUG ADMIN. U.S.

At a hearing in Washington the FDA lost several rounds in its suit against the Founding Church of Scientology of Washington DC and the tide has turned for the better.

Some people think Scientology is illegal in the U.S. because of this Meter business. But it's only the U.S. government's guilty conscience about "lie detector" only the meter is in question.

We have won round one apparently, our attorney looked good and the judge pleased and the government really unwilling to attack.

In Australia the "Enquiry" by Holy Joe Anderson, the famous Catholic bigot, is over and he is to make a report to the State Parliament probably next September.

Evidently both the Victorian Enquiry and the U.S. FDA hearing were inspired by the Catholic church! Very startling. I thought the Catholics stopped burning Witches when they were run out of England several hundred years ago. But no. They still hunt them with mad abandon. We ought to "hex" Anderson and the FDA.

By the way, the graves of the 3 witches the Catholics burned in East Grinstead in the 17th Century are the best tended graves in the cemetery!

It's almost a recommendation, it seems, to be harassed by the Catholics!

Things go well in general. I am sorry if price charges upset anyone. I'm doing all I can to ease it.

The new org board will soon be up in orgs.

Be sure to see it. It's the same board org-to-org and pole to pole. It's a "cognition chart" too. Look it over and it tells you where your life is going wrong! Fact.

You'll see lots of people around that board in Comm Centres. The students here were fascinated by it.

Hear the news about Clear?

You will in Auditor 8.

That's all for now. I feel just fine and hope you do too.

Best
Ron
