

(This is a copy of a handwritten dispatch by MSH)

HATS

28 May 1967

Further LRH Remarks

2. Intelligence - I can only think that Ho does not have his staff - he should have three people in his office - one in charge of investigations, one in charge of prosecutions, and one in charge of CIC for Intelligence.

Because the biggest lack in Intelligence at the moment is APPRECIATION or EVALUATION. I say this because I am getting vast quantities of unassessed data of the enemy, which I then have to spend long hours reading to see what intelligence value it has for use against the enemy. Such is not sent to me like so:

1. 1961 volume of WFMH magazine
2. Sent excerpts on article "Mental Health Gov't and Voluntary Citizens Participation" to PRO for use - see underlined sections.
3. Am investigating Bustamante connection to one Couton Bustamante (see page 31 underlined section.
4. Remainder of magazine is usual chaff.

Instead, I just get the magazine - xeroxed - which I then read through to make sure there is something we can use or do with it.

Another example is the copies of the Georgia Mental Health Law - these were sent over - no evaluation done.

I looked at it and read it all the way through and then decided that we could do something about it and sent orders to you with regard to same.

It should have been sent over with parts marked in it which violate the rights and liberties of the individual, which give false immunity of care of the patient, etc.

So we have Intelligence without a mind - just intelligence with its body being sent - the body being the rest of the bulletins, magazines, handouts etc.

The data should be read, evaluated and then reported on before being sent as in the example above.

I am sure you, also, are reading everything to make sure nothing is missed - I know I do. So this means Intelligence is not performing its full function.

Well, doll, get these in and I think we will have a much happier time with less Dev-T.

Love,

Mary Sue
