

GUARDIAN ORDER

GO 45
To All A/Cs and SO Staff

3rd June 1971

LRM has stated that 04.5% of PDCs were and are very successful. 15.5 % failed and the reason for this failure is that they were PTS to some SP.

LRM's order is NEVER SPECIALLY TRAIN ANYONE WITH PROBLEMS. This is now very important data, as every blow or upset has "had problems" in his area and turned out to be PTS to some SP.

The way to locate a PTS on the meter is by asking "Do you have problems in your area?" This is a masked way of asking "Are you PTS?". PTS might not read on a meter but problems will.

Before taking on a staff member, he or she must be checked on this and must not be PTS.

PTS Tech must be pushed into Orgs - It is now VERY important data.
