

The following people have been found by their consistent activities to destroy Scientology to be dangerous to Scientology orgs and staffs. They are few in number compared to our own, but regularly create more havoc than would be expected from their apparent spheres of influence.

We will not close the door forever on these few, but have withdrawn all forms of help as we are not in the business of saving wounded water buffaloes. Consequently any attempt by any of these listed to get back on lines, must be referred to Guardian's Office Bureau 4 section for Internal Security. The Ethics officer or whoever is covering will then handle as per advices given to him from bureau 4.
